Dear student,

Coursera Financial Aid is a special program to give Coursera students in all economic circumstances the chance to earn Course Certificates.
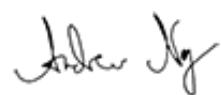

Financial Aid was designed specifically for those who face significant economic hardships, so that these individuals with genuine needs may be given the chance to earn a Course Certificate at no cost.

If you would like to earn a Course Certificate but cannot afford it, please apply now. We want you to get a high quality education, earn a Course Certificate, and share your success with others.

Note that providing the Course Certificate incurs significant costs for Coursera. Thus, please request this financial aid package only if you intend to make a serious attempt at completing the class. If we suspect abuse of this program, we may be forced to discontinue it, which would be to the detriment of many deserving students.

In order to be eligible for Coursera Financial Aid you must meet the following criteria:

- Demonstrate that paying the cost of a Course Certificate would cause economic hardship.
- Demonstrate values of academic integrity and contribute positively to the course's community.

If financial aid is the right option for you, please proceed by filling out this application:

What is your annual income in USD?

| $ | 0 | .00 |

Which country are you currently located in?

| India | ▼ |

Please describe your financial need and explain the specific circumstances that motivate your request for financial aid. (50-300 words)

I'm a student of one of the respected institutions in my nation "IIITDM". After my bachelors I want to pursue masters in " Artificial Intelligence" which is quiet challenging and requires me to do some pre-requisite courses that are certified. As, my majors is in Electronics I have no other chance but to do my pre-requisites over MOOCS, and get certified as they stand a great chance in helping me getting admission at Universities that offer masters in the "AI". As I'm a student currently my incomes is at zero line, and a help from you would do great for my career. I would definitely repay the sum that shall be provided to me as a financial aid as soon as I find job in my career, if that is not possible I vow you the Coursera team that I shall follow your motivation of helping a good number of poor students in gaining world class education.

Please tell us why you are taking this course. What is your interest in this field? How would a Course Certificate be valuable to you? (50-300 words)

My interest always lies in thinking, thinking about can there be a "Artificial Intelligence" that can think better than humans and make life easy for us. Till now I fascinated but started to on that side under the guidance of my professor at my college. My interest may be strong but requires quite a good amount of significant knowledge in the domains that lead me towards my goal. Starting with this course at COURSERA, I hope that the certification you offer make a good impression of me.
I've achieved a certificate from coursera on MACHINE LEARNING taught by Andrew.Ng. I paid for the course but not in a position to afford for this course and the future ones.
My current project deals on a good number of algorithms that needs to be re-born from the bases of those that build the same in the past, this course shall build steps for my success.

When participating in this course, how do you intend to demonstrate academic integrity and contribute to the course's community? (50-300 words)

I'm currently pursuing a lot of my dream subjects that are once my dream. This would definitely put me through a lot of effort but also gain a good amount of knowledge only by sharing my thoughts and ideas. Course community is one such place to do this, where the topic of discussion is centered to the subject. People from around the world with different levels of intuition and intellectuality get to meet at a virtual world of only thoughts and words, that is the forum of discussion. I'm one such person with good efforts to join world class society with this course and the future ones as my platform. Thank you once and for all for this opportunity.
